

## WAS WORTH A MILLION.

Death of an Eminent Widow in Massachusetts—Could Have Thrown Money at Will—It Was Hidden in Pockets, Briefcase, Closet and Every Conceivable Location About the Premises—Only One Having Relative.

BOSTON, Oct. 11.—Mrs. Sarah Coolidge, a widow, aged 75, who had for years resided at 324 Massachusetts avenue, Cambridge, died Tuesday evening of apoplexy. She had been considered eccentric, and was thought to be comfortably well off, but not wealthy. Four female servants, the only persons she would allow permanently around the house, were present when she was stricken, and she died before Dr. Chase, who had been summoned, arrived at her home. Immediately upon her death Alderman Cutler, who had for years been acting as her agent in her real estate transactions, was summoned.

### STARTLING DISCOVERIES.

When the body was prepared for burial some startling discoveries were made. Scattered about her person and in pockets of other dresses, pieces of brick, brass vases and closets, were found many thousands of dollars in gold coins and bills of large denominations. In fact, the money was placed in every conceivable location, and in almost every case where an ordinary person would not seek wealth. Twenty thousand dollars were thus found, and in one case a package of bills amounting to \$3,900 was found in a handbag. Then the searching party accidentally stumbled upon a number of deposit books in banks and savings institutions, which showed that she had many thousands of dollars on deposit.

### REAL ESTATE, TOO.

Later it became known that she was the owner of a vast amount of real estate, the major part of it located in Boston, which returns a big income. In addition to the money it was found that she had a very extensive and costly wardrobe. Elegant and valuable dresses that have never been worn were hung up in closets or laid on tables and dressers, while other articles of apparel equally costly were scattered about in various rooms.

The servants themselves, who had lived in the house for years, were astounded. Even they did not know of the wealth which surrounded them. They had frequently found bills, gold coins and securities lying around the rooms, and had always returned them to Mrs. Coolidge, who would tell them that she had mislaid them, but they were frequently found and as frequently handed over to the police.

### WORTH OVER A MILLION.

For over thirty years she had lived alone in this house with the exception of the servants, having about that time secured a divorce from her husband, James Coolidge, at one time connected with the Mount Auburn cemetery, who died many years ago. She inherited some money from her parents, and as it was judiciously invested, it grew until at her death it is estimated that she was worth over \$1,000,000. Her only living relative, so far as known, is a brother, J. P. C. Marshall, of 28 Beacon street, and if she died intestate, all her property will revert to him. It is claimed, however, that many years ago she made a will, but this is not known definitely.

## FRENCH IN MADAGASCAR.

The Queen Makes Peace, and Gen. Duchesne Has Been Made a Member of the Legion of Honor.

PARIS, Oct. 11.—The war office has received a dispatch from Antananarivo, under the date of October 9, stating that Antananarivo, the capital of Madagascar, was taken by the French troops on September 30, and that the queen of Madagascar has made peace with the French, and Gen. Metzinger has been nominated as governor of Antananarivo.

### Congratulated by the President.

PARIS, Oct. 11.—President Faure has wired an enthusiastic message of congratulation and thanks to Gen. Duchesne commanding the French expedition in Madagascar.

### Honors For Duchesne.

PARIS, Oct. 11.—Gen. Duchesne has informed the war office by telegraph that Antananarivo was occupied by the French expedition under his command after a brilliant action. President Faure has responded to the telegram by appointing Gen. Duchesne a grand officer of the Legion of Honor. The government will strike a Madagascar medal for the troops who took part in the campaign against the Hovas.

### What a French Newspaper Says.

PARIS, Oct. 11.—The Autour mentions rumors, which it says are traceable to the war office, where dispatches from Antananarivo are being withheld from the public, to the effect that Gen. Duchesne, commanding the French expedition in Madagascar, was compelled to treat with the Hova government in consequence of his having arrived before the capital totally without provisions, and having learned that the natives would burn the city and ravage the country if the French did not come to terms.

### Fatal Impatience.

ADA, O., Oct. 10.—W. S. Kitchen, of Findlay, O., superintendent of the Metropolitan Life Insurance Co. of New York, while here waiting for an early morning train, became impatient and attempted to board a west-bound freight and fell under the wheels. He was ground to pieces.

### CATTLE KILLED.

By the State Inspector Because Infected by Tuberculosis.

OWEGO, N. Y., Oct. 11.—The state inspector has killed twenty-three head of cattle belonging to Byron Jensen, a farmer living near here. All the animals were infected with tuberculosis. One week ago the inspector killed ten head of cattle owned by George Griswold. Butchers who saw the infected cattle after they were killed say that they have killed cattle having the same appearance as that the carcasses have been sold for beef.

### The Cup Contest.

The Forthcoming English Official Report of the Late Tacht Race.

LIVERPOOL, Oct. 11.—The Courier, in announcing the arrivals of Captains Cranfield and Gyeomore of Valkyrie III, says that various startling stories about the use of oil on troubled waters probably saved the lives of the crew of the schooner E. R. Williams recently lost in Green Bay. When the vessel foundered the crew took a lifeboat which was supplied with oil. Mariners who heard of the wreck were of the opinion that no lifeboat could live through such a storm.

## CONSTANT FIGHTING.

In Which the Insurgents Seem to Gain the Advantage, Though Without Definite Results—Narrow Escape of Gen. Canellas—Military Hospitals Filled with Soldiers Suffering from Yellow Fever, Which Generally Proves Fatal.

SANTIAGO DE CUBA, Oct. 1. Via Key West, Fla., Oct. 11.—Last week several encounters took place between Spaniards and Cubans in the Manzanillo and Guantanamo districts. In Guantanamo the Spanish columns of Colonels Zegura and Ruiz and Commanders Garrido and Lopez met the insurgents near Monte Libano, on the 29th ult. They fought bravely, and the official report says that two officers of the guerrillas were killed and forty soldiers wounded. The rebels had three men killed and two wounded, among the former being Commander Gabino Vasquez.

On the evening of September 23 Gen. Canellas narrowly escaped drowning while attempting to cross the River Cassey (Guantanamo). On September 27 Gen. Gonzales Munoz arrived at Manzanillo after being five days in the field. His force consists of 850 infantry, 150 mounted guerrillas, a company of artillery and another of engineers. This column met the rebels in different places between Veguita and Bueyeta. The Spaniards were carrying a large convoy, which the rebels attacked vigorously, attacking the Spaniards vigorously after filling the roads, where the column had to pass with trunks of large trees. It was with great difficulty that the Spaniards forced their way to Bueyeta.

The coffee plantation of La Alegria was the scene of another attack on the same column after it had delivered the convoy. This rebel party was commanded by Juan Massa Parra. At Sabana de Tara, the attacks of the insurgents on the troops were so terrible that the Spaniards had to fight altogether, infantry, artillery and engineers. In this encounter, according to the official report, the Spaniards had fifteen killed and seventy wounded. Private information is to the effect that there were many wounded.

Gen. Garcia Guerrero, with 200 men, left today to attack La Gran Piedra, fifteen miles from Daiquiri, where Jose Maceo has had his camp since the beginning of the war. This morning eighteen volunteers of the second battalion of this city were ordered to the field for active service. The sanitary condition here is very bad, the military hospital is filled with soldiers suffering from yellow fever, which generally proves fatal.

### FOR CUBAN INDEPENDENCE.

Celebration of the Anniversary of the First Uprising in Cuba.

JACKSONVILLE, Fla., Oct. 11.—A cablegram from Key West, Fla., says: Never in the history of this city has there been such enthusiasm as was displayed yesterday, the twenty-ninth anniversary of the first attempt for Cuban independence. From one end of the city to the other business houses and private residences were gaily decorated with American and Cuban flags. Many vessels in the harbor were also decorated with all the bunting available.

Promptly at 6 o'clock in the morning the booming of cannon began, and at the same time the American and Cuban flags were hoisted over the city hall. Speeches were made from the balcony by Messrs. Ben McLendon and Francisco Gonzales. The band played the national airs and the spectators cheered themselves hoarse. Both American and Cuban flags were also hoisted over the county courthouse.

The various Cuban clubs met at the San Carlos hall in the afternoon, and were joined by the several fire companies, U. S. A. R. corps and Sons of Veterans. They formed a procession, headed by the Key West cornet band, and marched to the cemetery, where patriotic speeches were delivered. The ceremonies finished, they marched back to the San Carlos hall, where they dispersed. Just as the procession arrived at the San Carlos and as the last gun was fired, it burst, instantly killing one colored man named John Francis, literally tearing off the top of his head.

## SPANISH FEARS.

Cause Serious Complications in Dealings with Alleged Filibusters.

WASHINGTON, Oct. 11.—Secretary Carlisle called on Attorney General Harmon yesterday and handed him several telegrams received by him from collectors of customs and others regarding the movement of alleged filibustering parties along the Gulf coast. The two cabinet officers discussed the situation at some length. It was agreed that no proper means should be left untried to prevent the violation of the neutrality laws.

The fact that so far all attempts to detain alleged filibustering expeditions have been thrown out of United States courts, led the administration to be cautious and thus avoid the possibility of suits for damages.

It is said that the Spanish agents along the Florida coast, in their zeal to secure information, seize upon rumors as facts, and many of these alleged facts being forwarded to federal officials have been ascertained upon investigation to be unfounded and incorrect.

## RESOLUTIONS.

Adopted by the Indiana Trades and Labor Union.

FORT WAYNE, Ind., Oct. 11.—At the afternoon session of the Indiana Trades and Labor union yesterday, resolutions were adopted favoring the free coinage of silver at the ratio of 16 to 1; one declaring in favor of the Cuban insurgents, and another extending a vote of thanks to Hon. John P. Altgeld, governor of Illinois, for the noble, manly and patriotic utterances recently made on the battlefield of Chickamauga.

## OIL ON TROUBLED WATERS.

Its Successful Use on the Great Lakes—A Great Life-Saver.

WASHINGTON, Oct. 11.—A report received at the hydrographic office, navy department, from Cleveland, O., says that the use of oil on troubled waters probably saved the lives of the crew of the schooner E. R. Williams recently lost in Green Bay. When the vessel foundered the crew took a lifeboat which was supplied with oil. Mariners who heard of the wreck were of the opinion that no lifeboat could live through such a storm.

## THE LONDON PRESS.

Comment Severely on Lord Sackville's Pamphlet—Foolish, Ill-Mannered, Ill-Mannered and Full of Thoughtless Bitterness—Courtesy of Protectionist Mr. Bayard Defended and His Course as Ambassador to England Praised.

LONDON, Oct. 12.—The Daily Telegraph, in an article commenting upon Lord Sackville's issuance of the pamphlet in which he makes an attack upon United States Ambassador Bayard, says: "A very foolish, ill-mannered, ill-timed and ill-made pamphlet has been issued by Lord Sackville with the purpose of injuring the reputation of Mr. Bayard, a noted protectionist. The ambassador, charging him with being a political trickster and consistent and determined enemy of England. The whole thing is so full of thoughtless bitterness that it is not worth while to reproduce any part of the brochure. We only hope that the common sense and practical good judgment of the English and American public will treat this uncalculated attack with contemptuous disdain. Those concerned with diplomatic history will be the first to assure Mr. Bayard that no effect whatever is likely to be produced by such a series of charges, so utterly unworthy of attention or consideration. During his sojourn here, Mr. Bayard has earned golden opinions for his urbanity and his keen judgment of affairs, and above all has made studious efforts to cultivate amicable feeling between England and America. To him the English are learning a fuller appreciation of and a higher admiration for the great republic."

Expected to Treat the Scream with Silent Contempt.

LONDON, Oct. 12.—The Chronicle today says it is expected when Ambassador Bayard returns to London that he will decline to be drawn into a controversy with Lord Sackville. The feeling existing in reference to the pamphlet is one of unqualified regret. This finds its strongest expression in diplomatic circles, where the incident is a matter of general comment.

## SECRETARY OLNEY.

Declines to Discuss the Alleged Notice to the Spanish Minister that the Cuban Revolution is Unlawful.

BOSTON, Oct. 12.—Secretary Olney, although several times questioned about the matter to-day, declined to discuss the question that the administration has notified Minister Dupuy de Lome "that there is a necessity for Spain to act promptly in order to suppress the Cuban revolution."

The fact that the report was published immediately following an interview yesterday seems to give color of truth to the statement, but in view of the near approach of the day of the meeting of congress, and of the fact that President Cleveland must, almost necessarily, refer to the subject in his annual message to that body, it is more than probable that there has been no communication made to Minister Dupuy de Lome on the subject of the change of policy on the part of the administration to take effect before the meeting of congress.

Mr. Dupuy de Lome makes weekly visits to Washington from Bryn Mawr, where he is spending October with his family, to call upon Secretary Olney on the regular diplomatic day at the state department. He was seen Thursday by a representative of the United Press, to whom he stated that his presence in Washington at that time had no especial significance. He returned to Philadelphia yesterday morning.

DUN'S COMMERCIAL REVIEW.

Indications of the Price Barometer Not Altogether Favorable.

NEW YORK, Oct. 12.—G. G. Dun & Co. in their weekly review of trade issues to-day say: The price barometer gives indications that are not entirely favorable. Cotton goods go up with increasing evidence that the crop of cotton is short. Prices of other manufactured products, of wool, hides and leather, all show some decline.

Money markets are neither strained nor threatening, foreign exchange no longer raises apprehension, and all fears about the great northern crops are passed. There is no doubt of the advances in wages of labor within the past month and only a few works have been closed by strikes for an advance.

In woolen manufactures a demand for dress goods and some specialties keeps many mills and men fully employed.

It is too early for cotton movements to cast much light on the probable yield. At present prices, averaging 8½ cents in southern markets, against 5½ cents a year ago, 7,000,000 bales would bring \$18,000,000 more than 9,000,000 bales brought last year. Mr. Ellison, the financial European authority, shows that 2,977,000 were held September 1 in ports and at mills here and abroad.

Wheat receipts have been 7,351,474 bushels, against 4,690,181 last year; Atlantic exports, only 707,429 bushels, flour included, against 1,998,786 last year.

Failures for the week have included two banks and several concerns of some size, and have been 368 in the United States, against 231 last year, and 63 throughout Canada, against 48 last year.

Failures for the week have included two banks and several concerns of some size, and have been 368 in the United States, against 231 last year, and 63 throughout Canada, against 48 last year.

## DREADFUL ACCIDENT.

Four Men Killed and Many Heavily Injured by the Collapse of a Building.

CLEVELAND, O., Oct. 12.—Four men were killed and seven others probably fatally injured as the result of an unexplainable accident at the Cleveland Rolling mills at 3 o'clock last night. The furnaces were carrying heavy fires, and the casting department was working a full force. Without warning, and in a manner wholly inexplicable the casting house, the large steel building of the plant, collapsed, burying several men in the debris.

## THE BRIBE DIDN'T WORK.

A Plot to Effect the Escape of Harry Hayward Discovers.

MINNEAPOLIS, Minn., Oct. 12.—A plot has been discovered to effect the escape of Harry Hayward, the murderer of Catherine Gilling, from the county jail. Duplicate keys were made in some way which fitted his cell door and the outer door. These keys were found by a deputy and they fitted the locks perfectly. A bribe had been offered to one of the deputies to aid in the escape, a fact which the deputy reported to the sheriff.

## PROGRAMME OF REPUBLICANS.

Beliefs of the Protectionists for Raising the Revenue.

The Washington correspondent of the Chicago Tribune is authority for the announcement that the republican leaders have practically agreed upon their financial programme for the coming session of congress. "The idea of more revenue through a revenue tariff on wool, with the Allison notes for emergencies, will be the republican financial scheme," says this correspondent.

Whether he has learned this directly from the republicans or by making a survey of the situation on his own account, very likely he is right. The republican leaders may not have come to a distinct understanding yet, but logically they cannot vote to increase the revenue without at the same time voting to protect somebody. Just as the producers are the most clamorous of all the late republican program, and naturally their demands will be the first considered. Other producers of raw materials, such as coal and iron ore, are still protected to some extent, and there will be a corresponding demand for their protection. The woolen manufacturers must have more protection if the price of their raw material is to be increased by protective duties. The republicans already have legislated upon this principle, and the woolen manufacturers will not only be the beneficiaries, but also in order to retain the support of their most valuable allies, the manufacturers.

When they increase the duties on manufactures of wool in order to compensate for the duties imposed on the wool, which is a matter of mind effect of duty, or at least, the intended effect, is to raise the price of the article on which it is laid. They admit that a duty on wool is intended to raise the price of wool. They must, then, admit that an increase in the duties on woolen goods will raise the price of those goods. Otherwise raising those duties would not compensate at all for the duties laid on wool. Are the republicans prepared to admit that they wish to increase the prices of all woolen goods? What do they think consumers will do if the price of woolen goods is raised? They must make the admission, and the democrats are willing that they should.

As for the "Allison notes," it will be necessary to issue securities of some kind if the government needs thirty million dollars more revenue, as the republicans claim, and if no more revenue is to be raised, the government will have to raise the price of wool and woolens would provide more than half that sum.

It is estimated that this republican programme has been agreed upon on the assumption that the administration will not take the responsibility of recommending any plan for raising more revenue. "The administration," we are told, "would like the revenue without the responsibility." If the republican programme is wholly contingent upon this assumption we may rest assured that it will not be entered upon. President Cleveland has never yet hesitated to recommend any measure that he deemed necessary or of great importance and there is no reason to think that he is going to lose the political white feather at this late day. If he thinks that the revenue is so short that he will not hesitate to say so or to let congress know that what he wants is revenue and enough of it, and not tariff protection for the Ohio shepherds or anybody else.—Chicago Chronicle.

## THE WHEAT SITUATION.

Improving Conditions Under the Wilson Law.

A high tariff contemporary claims that Europe bought more "high-priced" wheat from us under the McKinley law than low-priced wheat under the Wilson law.

Yes, it did. In 1892 because of crop shortages that year and the year before in Europe. Crop damages were so great that some of the European countries suspended their duties on grain and otherwise favored by legislation the import of American wheat. But McKinley's could not help our farmers. Our crop shortage this year and the year before in Europe. Crop damages were so great that some of the European countries suspended their duties on grain and otherwise favored by legislation the import of American wheat. But McKinley's could not help our farmers. Our crop shortage this year and the year before in Europe.
